Mathieu Flamand – Assistant Professor, Faculty of Medicine, Université Laval

Mathieu Flamand is an assistant professor in the Department of Psychiatry and Neuroscience at Université Laval, and a researcher in the Neuroscience Axis of the Centre de Recherche du CHU de Québec since July 2023.

He received a bachelor's degree in biochemistry from Université de Montréal and a Ph.D. degree in biochemistry from McGill University before joining Duke University as a postdoctoral scholar in 2017.

His research focuses on the fundamental roles of RNA modifications and RNA-binding proteins in synaptic plasticity and neurodegenerative diseases.
